## 5.4 Local Exchange Service Optional Features

## 5.4.1 Direct Inward Dialing (DID) Service

Direct Inward Dialing ("DID") permits calls incoming to a PBX system or other Customer Premises Equipment to be routed to a specific station without the assistance of an attendant. DID calls are routed directly to the station associated with the called number. DID service as offered by the Company provides the necessary trunks, telephone numbers, and out-pulsing of digits to enable DID service at a Customer's location. DID service requires special PBX software and hardware not provided by the Company. Such hardware and software is the responsibility of the Customer.

The following charges apply to Customers subscribing to DID service provided by the Company. These charges are in addition to recurring and non-recurring charges for PBX Trunks as identified elsewhere in this tariff. The Customer will be charged for the number of DID Number Blocks (20 numbers per block) regardless of the number of DID numbers utilized out of the available 20 numbers.

- (D) Caller ID - Allows the subscriber to view the listed telephone number from which the incoming call is dialed before the call is answered. The calling number is displayed on a Customer provided compatible device attached to the Customer's telephone line.

The telephone numbers that will be displayed on a Caller ID subscriber's display unit will include listed, non-listed, and non-published telephone numbers.

The telephone numbers that will not be displayed to a Caller ID subscriber are: (1) calls from callers who use Per-Call or Per-Line Blocking; (2) calls from callers located in central offices not a part of the SS7 Signaling System; and (3) calls placed through an operator.

- (E) Caller ID Deluxe - Allows subscriber to view listed name associated with the telephone number before the phone is answered. The calling number and name are displayed on a Customer provided compatible display device attached to the Customer's telephone line.
- (F) Anonymous Call Rejection (ACR) - Blocks calls from callers who prevent their telephone numbers from being displayed on a Caller ID device.

(G) Caller ID Blocking

A calling party may block the passage of his/her telephone number, associated main listed name and voiceback of calling identification information to users or subscribers to Optional Central Office Services which utilize Signaling System 7 (SS7) technology. Blocking will also prevent call completion through the use of Return Call Service.

Customers have two blocking options as follows:

A. Per-Call Blocking

Per-Call Blocking will prevent the display of Customers' telephone numbers on outgoing calls. This feature may be utilized at any time through the activation of a special code prior to dialing an outgoing call.

Per-Call Blocking is provided at no charge, and is automatically placed on all telephone lines by the Company.

Per-Call Blocking will not prevent the display of telephone numbers to 911 emergency service providers.

5.4 Local Exchange Service Optional Features, (Cont'd.)

5.4.4 Custom Calling Features, (Cont'd.)

B. Per-Line Blocking

Customers requesting Per-Line Blocking will prevent the display of their telephone numbers on all outgoing calls. The Per-Line Blocking feature may be deactivated at any time by Customers on a call-by-call basis through the activation of a special code. Blocking will be deactivated for that outgoing call only. Per-Line Blocking is provided free of any recurring charge, but is a special feature which must be ordered by Customers.

The Company will initially install Per-Line Blocking at no charge. Requests to remove Per-Line Blocking on Customer lines will be completed at no charge. Subsequent requests to re-install Per-Line Blocking will be completed at prevailing Company non-recurring service order rates.

Per-Line Blocking will not prevent the display of originating telephone numbers to 911 emergency service providers.

Customers who use either per-call blocking or line blocking may be unable to complete calls to Caller ID Number/Caller ID Name subscribers who have activated the Anonymous Call Rejection feature of Caller ID Number/Caller ID Name Service. If a customer using blocking calls a Caller ID Number/Caller ID Name subscriber who has activated Anonymous Call Rejection, he/she will hear an announcement that the Caller ID Number/Caller ID Name subscriber is not accepting blocked calls. There are several ways to complete a call to a Caller ID Number/Caller ID Name subscriber who has activated Anonymous Call Rejection: (1) place the call through an operator; (2) place the call using a calling card; or (3) place the call without blocking. Options (1) and (2) involve charges in addition to the cost of the call.

SECTION 6.0 - MISCELLANEOUS CHARGES AND SERVICES, (CONT'D.)

6.4 Carrier Presubscription

6.4.1 General

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier that the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an IntraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

6.4.2 Presubscription Options - Customers may select the same carrier or separate carriers for intraLATA and interLATA long distance. The following options for long distance Presubscription are available:

- Option A: Customer selects the Company as the presubscribed carrier for IntraLATA and InterLATA toll calls subject to presubscription.
- Option B: Customer may select the Company as the presubscribed carrier for IntraLATA calls subject to presubscription and some other carrier as the presubscribed carrier for interLATA toll calls subject to presubscription.
- Option C: Customer may select a carrier other than the Company for intraLATA toll calls subject to presubscription and the Company for interLATA toll calls subject to presubscription.

SECTION 6.0 - MISCELLANEOUS CHARGES AND SERVICES, (CONT'D.)

6.4 Carrier Presubscription, (Cont'd.)

6.4.2 Presubscription Options, (Cont'd.)

Option D: Customer may select the carrier other than the Company for both intraLATA and interLATA toll calls subject to presubscription.

Option E: Customer may select two different carriers, neither being the Company for intraLATA and interLATA toll calls. One carrier to be the Customers' primary intraLATA interexchange carrier. The other carrier to be the Customer's primary interLATA interexchange carrier.

Option F: Customer may select a carrier other than the Company for no presubscribed carrier for intraLATA toll calls subject to presubscription which will require the Customer to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.

6.4.3 Rules and Regulations

Customers of record will retain their primary interexchange carrier(s) until they request that their dialing arrangements be changed.

Customers of record or new Customers may select either Options A, B, C, D, E or F for intraLATA Presubscription.

Customers may change their selected Option and/or presubscribed toll carrier at any time subject to charges specified in 6.4.5 below:

6.4.4 Presubscription Procedures

A new Customer will be asked to select intraLATA and interLATA toll carriers at the time the Customer places an order to establish local exchange service with the Company. The Company will process the Customer's order for service. All new Customers' initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new Customer is unable to make selection at the time the new Customer places an order to establish local exchange service, the Company will read a random listing of all available intraLATA and interLATA carriers to aid the Customer in selection. If selection is still not possible, the Company will inform the Customer that he/she will be given 90 calendar days in which to inform the Company of his/her choice for primary toll carrier(s) free of charge. Until the Customer informs the Company of his/her choice of primary toll carrier, the Customer will not have access to long distance services on a presubscribed basis, but rather will be required to dial a carrier access code to route all toll calls to the carrier(s) of choice. Customers who inform the Company of a choice for toll carrier presubscription within the 90 day period will not be assessed a service charge for the initial Customer request.

Customers of record may initiate a intraLATA or interLATA presubscription change at any time, subject to the charges specified in 6.4.5 below. If a Customer of record inquires of the Company of the carriers available for toll presubscription, the Company will read a random listing of all available intraLATA carriers to aid the Customer in selection.
